

Modifications for Interview Dashboard –

1. Dashboard (home) page:

The sequence of fields in dashboard table should be-

- Candidate name
- Candidate email
- Status
- Technology
- Post
- Schedule date
- Schedule Time
- Schedule by
- Interviewer name
- Interviewer mail
- Remark

2. Fields in schedule form:

Some fields have to be changed as choicefields(Dropdown).

Fields and choices in schedule form

- **Company:** Uptricks, Kukbit, Skillbit, Learntricks, Challengekatta, Happieloop, Internshipmela.
- **Technology:** Video Editor Animation, Android Development, Game Development, Graphics Designing, Software Testing, Manual Testing, Full-stack Development, Human Resource, Digital Marketing, Wordpress Development, Web Auditor, Web developer, Business development executive, Machine learning, Data Science, AWS.
- **Post:** Internship, Job.

3. Colour coding on dashboard:

While showing the data on dashboard, is it possible to show with the different colours as per the status? Try if possible. (Red for Not showed, Green for Showed etc.)

4. Search option:

Add a search functionality on the dashboard page. We have to search the candidate with Name or Mobile number.

Also, while scheduling the interview check the candidate is present in database or not by using the contact number. (Filter the database before saving/scheduling, using contact number.)

If the candidate is present in database show the history(record) with a message. And provide options, 'Schedule Anyway' and 'Cancel'.
